

Does not always work, may take 10-15 minutes. If the.zip file doesn't exist try a new one. If you don't find a working one please post it. Steps: Download and run the ZIP file from the link above. Enter the path to your PowerDVD installation folder as a location to decompress. Double click on the file "Ultra-11.0.2024.exe". Wait and Enjoy! If you are running windows 7 then click this link for the folder where the setup is. If you are running windows vista then click this link to find the folder. C:\Program Files\CyberLink\PowerDVD\Credit : CyberLink forums. Q: Thread.sleep(n) in spring batch My JobExecution reads data from DB, adds to DB, and writes to a DB. What would be the appropriate way to sleep each step in the job? A: You can use a StepListener to interrupt the execution of the step (see @Bean public Job job() { return jobs.get("job") .incrementer(new CronIncrementer()) .start(step1()) .build(); } public Step step1() { return stepBuilderFactory.get("step1") .chunk(1) .reader(reader()) .writer(writer()) .build(); } The thread will be interrupted with an InterruptedException. // // Copyright (C) 2004 Andras Varga // // This program is free software; you can redistribute it and/or // modify it under the terms of the GNU Lesser General Public
