FIG. 1 shows a conventional current limiter that includes a stack of wires W. The wires W are stacked with an insulating spacer S between adjacent wires W. The stack of wires W is wrapped about a main body 01 of the current limiter and an outer shell 11 is disposed about the outer circumference of the stack of wires W. The outer shell 11 is positioned about the main body 01 with a substantially U-shaped clip 12 having an upper wall 13 that wraps around the stack of wires W and a lower wall 14 that fits in a substantially U-shaped groove 15 formed in the main body 01. In this way, the stack of wires W is positioned in the groove 15 between the upper wall 13 and the lower wall 14. Thus, the current limiter is a self-contained device that must be mounted to a pair of electric wires (not shown) after the wires are connected. In other applications, the wires are connected and the current limiter is installed in a panel before the electric wires are connected. For example, in a system that uses thin cables, such as distribution cable, with multi-wire conductors and/or shields, the wires may need to be connected and the current limiter is installed in the panel before the electric wires are connected. In such applications, the current limiter must be easily installed and connected with the wires in a way that protects the wires and the current limiter from damage during installation and connection. The present invention provides a current limiter that is easily mounted to a pair of electric wires with a splice. The current limiter includes a main body and an outer shell. The main body is formed from a sheet of metal having apertures therethrough. Each aperture has a diameter that is less than a diameter of the electric wire that is inserted through the aperture. The main body is wrapped about the electric wire and an outer shell is secured about the outer circumference of the main body. The outer shell is formed from a sheet of metal and includes a substantially U-shaped clip and a cover plate. Each of the cover plate and
