Responsiveness of Cu²⁺ sensing GOx/carbon paste electrode to glucose detection in serum. Glycogen metabolism of the diabetic patients has been shown to be altered due to excessive intracellular glucose concentration in cells. As a result, the intracellular glucose concentration is decreased by glycolytic flux which is induced by the excessive glucose concentration. To prevent the over production of toxic by-products of the diabetic patient, the monitoring of glucose concentration in the body fluid is important. In this study, carbon paste electrodes (CPE) modified with glucose oxidase (GOx) were prepared and the glucose response to the electrode was investigated in serum. The oxidation current of the electrode in serum was increased by the glucose concentration. The oxidation current was proportionally dependent on the glucose concentration. The response time to the maximum current was less than 30s and the response was reversible. It was confirmed that the electrode had a high stability in serum. It was suggested that the glucose concentration can be determined by using the electrode.

Q: Do I need to include 'this' when using a ref function call from within a class? I've seen the following code being used when declaring a method within a class in an object-oriented fashion: `public void MyMethod() { this.MySubMethod(); }` Why should I explicitly use the "this" keyword when I am inside of MySubMethod? I'm not dealing with any other classes within MySubMethod. Does the "this" keyword get interpreted differently when declared within a class? Thanks for the help.

A: you need to use the this keyword to access members of the class you are invoking the method on

Video Recording Rhythm Beats MediaChoir : Heavenly Voice PuthurJoin this channel to access . We have music videos, music videos, music videos, music videos, music videos, music videos, music videos, music videos, music videos, music videos. Video for the song Heavenly Voice - Puthur. Artist Rhythm Beats. Video for the song Puthur - Heavenly Voice. Music from the movie "Titanic" - We are the World. fffad4f19a
