You can prevent data duplication of your files and folders and restrict any illegal distribution by any means. This is made possible as Copy Protection, which has already acquired a good reputation. Features You can protect any file or folder from being duplicated or transferred illegally. You can define the file or folder ownership and restrict other users to a particular ownership for any file or folder. You can convert any file into a universal encrypted file and protect it using passcodes. You can create a virtual folder in any location to protect the contents of the folder. With a unique feature, you can protect your virtual folder even if the folder is deleted. Setting up Copy Protect is just a matter of a couple of clicks and you can get started as quickly as an hour. Copy Protect is one of the very few programs that allows you to protect any file or folder easily, without any reformatting or reformatting. Copy Protect 2.0.5 Crack With Keygen Full Version Download Copy Protect can make any file unrecognizable, which is necessary for protecting it from illegal distribution. You can create a virtual file in any location to protect the contents of the file. Copy Protect is an even more advanced data protection program than any other application that you can find in the market. You can protect any video file or even an audio file with a passcode to prevent illegal duplication and distribution. You can rename any file or folder with a unique random name or you can convert it into a universal encrypted file to protect it from illegal distribution and duplication. Once a file or folder is protected using a random passcode, you can easily extract the password from the file and use it to decrypt the file to get the original file. It allows you to protect any type of content that you want. How Copy Protect Works? Copy Protect allows you to protect any file or folder. You define the file or folder ownership and restrict other users to a particular ownership for any file or folder. You can also convert any file into a universal encrypted file to protect it and restrict the users from illegal duplication and distribution. You can protect any file or folder or even an audio or video file. You can create a virtual file in any location to protect the contents of the file and it will remain even after the file is deleted or renamed. You can also protect any video file or
