Is it possible to access

EntityManagerFactory? Or is it only
available at runtime? A: I think the

XML configuration of Spring for embedded databases was never intended for end user applications. As a matter of fact, if you examine the `src/main/java/org/springframework/orm/jpa/LocalContainerEntityManagerFactoryBean.java` file, you'll see that all the bean configuration goes in the constructor. This includes creating a `DataSource`. The local database management isn't relevant when you use an embedded database in a webapp, which I guess is what you're doing.

Q: Evaluate the integral $\int_0^{\pi} \frac{1}{\sin^2(x) + \cos^2(x)} dx$

Evaluate the integral $\int_0^{\pi} \frac{1}{\sin^2(x) + \cos^2(x)} dx$

$\int_0^\pi \frac{1}{\sin^2(x) + \cos^2(x)} dx$

We can write this integral as

$$\int_0^\pi \frac{1}{\sin^2(x) + \cos^2(x)} dx = \int_0^\pi \frac{1}{\sin^2(x) + \cos^2(x)} \cdot \frac{1}{\sin^2(x) + \cos^2(x)} dx = \int_0^\pi \frac{1}{\sin^2(x) + \cos^2(x)} dx$$
