Jarrod Radnich Category:1953 births Category:Australian classical pianists Category:Australian classical composers Category:Living people Category:Musicians from Sydney Category:Musicians from Melbourne Category:Place of birth missing (living people) Category:21st-century classical pianistsQ: Is there a way to get records that have not yet been worked on? I am trying to figure out how to create a where clause that would work on a list of records and include all records that have not yet been worked on, or have at least 2 weeks of processing time remaining on them. So for example, the records would be grouped by team/project. Some teams and/or projects are process and have a certain amount of time before their records are closed (e.g. 2 weeks). I would like to show records that are still in the process, and show as not processed. Example: Team | Project T1 | P1 T1 | P2 T2 | P1 T2 | P2 I would like to only return the records that have 2 weeks or less left in their process and have team P2. So the example I would get back is: Team | Project T1 | P1 T1 | P2 T2 | P2 Thank you, any help is appreciated! A: this is all it takes `SELECT DISTINCT Team, Project FROM yourtable GROUP BY Team, Project HAVING MAX(ProjectStatus) = 'Process' AND MAX(ProjectStatus) 'Closed' AND 2d92ce491b`
