shortcut for the system's one. Being nothing than a launcher for another app, WhatsAppCallRecorder does not need a user interface. Also, even if the package contains an executable file, that's not an installer. The tool is portable. All you need to do is to launch it, and it will do its job from within the system tray. Triggering the recorder requires no interaction. Each time you get a call on WhatsApp, the voice recorder will be automatically pushed forward, allowing you to decide between ignoring or run it. All things considered until WhatsApp implements a recording feature, WhatsAppCallRecorder can be seen as a substitute. But remember, this is just a launcher for a tool that comes with your OS WhatsAppCallRecorder Description:

If you are one of those who are dedicated to looking at Android running devices in general, then you most likely use it on a daily basis, and always hoping for newer devices and great features which will surely make your experience better and perhaps, you can't afford to have its performance compromised. For those of you who use their mobile phones daily, then you probably depend on some of the most used applications, and undoubtedly WhatsApp is at the top of the list. While everyone is wondering how users can capture audio on their device, there is a way to do it. You can easily record your voice messages on your Android mobile phone using a third-party app such as WhatsAppCallRecorder. WhatsAppCallRecorder is a free small application that will allow users to activate the system's voice recorder that is common to all Android versions from 2.1 to 4.4, both smartphones and tablets. It works mainly by launching the standard Android application of the same name which normally has to be opened manually in order to capture a voice message, and all you need to do is to choose the type of recording you want to set:

- **Text:** You will be able to record up to 40 seconds of audio per WhatsApp message.
- **Voice:** You will be able to record up to 1 minute of voice message per WhatsApp message.

WhatsAppCallRecorder is a small application designed for Android smartphones and tablets which allows users to capture WhatsApp calls automatically without the need of the user interface of the software. The utility does not add any significant features or add any new features to the existing ones but it's just a shortcut for
