GUI (Graphical User Interface) AutoCAD for both AutoCAD 2015 and AutoCAD LT have a GUI (Graphical User Interface) application. It is designed to be easy to use and user-friendly. The GUI, in AutoCAD 2015 and AutoCAD LT, consists of eight main frames, five frames under the Main, Customization and Help menus, the Model browser, and the Document Properties and Preferences frames. These are the main frames, with

the exception of the Model browser, which is more accurately called a "view". Within the main frames are the functions of the application. The Main menu is the top menu and contains the commands for opening and closing the application and the menu bar. It also contains three sub-menus, each of which contains the commands for performing a certain set of tasks. The Customization sub-menu contains the tools for customizing the application. The Help menu contains the commands for viewing help information and accessing online help. The Model browser is used to select the object that is being edited, or that will be edited when the user selects a command. The Main menu, Customization menu, Help menu, Model browser, and Document properties and preferences frames are available in AutoCAD LT as well. As with most Windows applications, AutoCAD can use a mouse or a "TrackPoint". The two major differences between a mouse and a TrackPoint are that the mouse pointer moves continuously on a screen, whereas the "TrackPoint" moves in a well-defined direction on the screen. Therefore, on a computer with a mouse, the user's position is on the screen as the mouse moves. The "TrackPoint" moves in a direction on the screen but the position is not on the screen. This provides the user with greater control of the object's position and orientation. The TrackPoint is connected to the PC using a cable and the user may configure its position by using a program called AutoCAD Control Points. In AutoCAD, the use of the TrackPoint is selected using the Mouse/TrackPoint menu in the Customization menu, which enables the user to switch between mouse and TrackPoint usage. Some editors have a Menu Bar containing all of the standard commands for editing a file. In this case, an individual icon will be assigned to the command in order to help a user to find the command quickly. The default Menu Bar appears when a user opens the Editor in the Standard Toolkit. In addition to standard 5b5f913d15
