It is also Web-based IDE designed for users to create both stand-alone and web-based measurement solutions in a drag-and-drop WYSIWYG experience. Measurement Studio is a visual measurement and testing tool for web and desktop applications, including the following: Measurement Studio allows engineers to create test procedures and analytical tools with a web-based user experience that provides multiple editors and tools for creating various types of measurement solutions. Building Blocks - Measurement Studio allows you to create test procedures and measurement solutions quickly. Implementation and Flow Chart - Measurement Studio includes a graphical tool that uses a flow chart design that organizes the steps in an intuitive and visual format. It is a drag and drop tool to create a test procedure for measurement and analysis. Advanced Solution Builder - Measurement Studio helps you visualize test procedures for measurement and analysis. It is a two-way Data Source Designer that includes Data Sources such as Lists, Tables, and File System - to generate automatically, and schedule. Automation Runtime - The tool provides the following widgets for automation runtime components: test conditions, listeners, and timeline. Reporting and Insights - Measurement Studio gives you the ability to generate reports and provide insights from measurements automatically. Remote support - The tool provides the following options for remote support: Text and Voice chat; real-time reporting; and remote access to the application and to the GitHub repository. It also gives an option to monitor measurement solutions remotely. Measurement Studio Application Options
