INTRODUCTION FIFA is a must-have football game for all fans of the sport. A few months ago, our development team took on the challenge of creating a new gameplay experience that added a new dimension to the genre. With our latest game, FIFA 22 for Xbox One and PlayStation®4, we have created a deep and complete game, where innovation meets the classic football spirit. HyperMotion™ Technology is the key to make a FIFA like no other before. Through “FIFA 22,” we used the data from real-life players to create the most authentic, thrilling, and exciting football experience in the history of the series. We wanted to make the most immersive football game ever, and bring new challenges to the genre in such a way that will never be forgotten. To create this new experience, we decided to combine the strength and character of the last generation with the power and realism of the next generation. Together with the developers from EA SPORTS™ FIFA, we used the advanced tool to track and analyse every single player, in motion. FIFA is the largest sports franchise in the world, with more than 900 million players on PlayStation 4, Xbox One, PC and mobile platforms. We know that our players have the same passion for the game as we do at EA SPORTS. They follow everything we are doing and represent our vision. We are

If you've ever seen the FIFA series on TV, you'll know it is famous for its big name players and incredible World Cup-style presentation, but we reckon it might not be so well-known that it's also the biggest football video game in the world. A year-and-a-half after FIFA 2017 was released, FIFA 2018 marks the 25th anniversary of the series. What better way to celebrate than to invite people who love football and sports video games together in the most popular football video game of all time? FIFA is also one of the most popular simulation sports games on the PC, PS4 and Xbox One and releases on February 16. Join us as we take a look at the new additions and improvements in this season of FIFA. New features UEFA Euro 2016 is out and it's time for the next big tournament on PC,

PS4 and Xbox One. FIFA 18 released last year and you'd be forgiven for thinking that was the last big football game for a while, but it turns out that new features are on the way to add to the existing content. The most exciting of these is probably FUT Draft Pick. This feature was introduced in FIFA 17 and lets you create your own team from the previous season of FIFA Ultimate Team, which is free to do. It's different from Ultimate Team because you're not randomly earning packs at the end of a match, you're doing it by adding players to your team for the duration of a season. To be available in the 2017/2018 FIFA World Cup-themed FUT Draft Pick, you'll have to spend \$0.99. This gives you the maximum amount of players you can add to your team per season, including club players in your squad. It won't automatically apply to this season's FUT Draft Pick, but you'll be able to bring it back next year. The 24 best players of your previous season will be made available to use in FUT Draft Pick. You'll also be able to continue using other draft picks from previous years of FIFA (so you can save your progress on previous drafts and carry it over to the new ones). The new FUT Draft Pick is a great way to build your Ultimate Team and is ideal for fantasy football. We're excited about it and think it's going to be worth spending the extra money if you want to give it a go. The new "Recommend Players" feature also appears in F bc9d6d6daa
