## **Mouse Locator Crack + Free Download X64**

If you are a user of Windows operating system, then you probably know where your mouse cursor is located on your screen. However, sometimes, you might not be aware of its current coordinates, even when you make it clear to your screen and even when you do so every minute or two. In addition to that, it might happen that you want to keep a specific notebook handy and you want to determine your current mouse cursor's location regardless of its ability to provide you with on-screen information. In these situations, Mouse Locator can help you determine your mouse cursor's current on-screen X and Y coordinates. Whether you use it on your notebook, desktop computer, or portable device, you can use Mouse Locator to easily determine your mouse cursor's on-screen X and Y coordinates by specifying its on-screen location. It is extremely straightforward and does not require any installation or configuration. How to Use Mouse Locator: Run Mouse Locator as your system start-up utility and it automatically detects your mouse cursor's on-screen coordinates. Hence, you can determine these coordinates whenever you want, regardless of your platform. Its main purpose is to display your mouse cursor's current on-screen location in an easy-to-read manner. Therefore, if you are not a technician and just wish to quickly determine the coordinates of your cursor, you can rely on this tool. However, if you are looking for an accurate, precise tool that can help you determine your mouse cursor's on-screen coordinates while working, you will need to wait for a short time in order to get a consistent reading. When you start running Mouse Locator, it displays a small readout, showing you your mouse cursor's X and Y coordinates. The information displayed shows the pointer's location in relation to your main windows and its on-screen coordinates are updated every 200 milliseconds. If you want to add the information to your system's clipboard, you have to disable the tool's Always on Top function by clicking on its icon. When you disable this function, you can access its configuration menus and add the data displayed in the readout to a text document or send them to a clipboard. Main Features: The following is a list of the main features that you can find in Mouse Locator. •Free. •No installation required. •No additional configuration required. •Displays the X and Y coordinates of your mouse pointer's on-screen location. •Offers a 200-millisecond

---

## Mouse Locator License Key

Mouse Locator is a portable mouse pointer locator tool that requires no extra configuration. Although this tool is a portable utility that does not require any installation, it still offers an extra convenience, namely allowing you to drop it to the system tray and unplug it from your computer without damaging your operating system. When your mouse cursor is inside the application's recording area, the tool will display the coordinates for you. The application records the on-screen X and Y coordinates of your pointer cursor for each frame of the application's runtime. The tool will also display the normal mouse cursor position in case its recording area is outside the active area. When the frame exceeds 200 milliseconds, the recording will start over. When it expires, the next recorded frame will be used. The application works by interpreting the mouse events, which include: Resize window by dragging the window Move mouse cursor by panning the mouse cursor Scroll down/up by moving the mouse cursor It also checks mouse events that are generated by other applications, and regardless of the type of event, it will provide you with the information of the mouse cursor's on-screen X and Y coordinates. You can also display the coordinates by specifying the frame number. You can keep the tool running in the system tray, or you can simply add the item to your startup applications list by uninstalling the application before launching it the next time.

**FEATURES of Mouse Locator**

- Displays mouse cursor position in the bottom right corner of the application's display area.
- Does not require any additional configuration.
- Records the mouse cursor's X and Y on-screen coordinates for each frame in the runtime.
- Does not modify any settings of the system.
- Runs in the system tray.
- Selects and updates mouse cursor position by moving or panning it.
- Displays mouse cursor position with milliseconds of delay.
- Displays the X and Y on-screen mouse cursor positions in case the recording area is outside the application's active window.
- Displays mouse cursor position in case the mouse cursor is over it.
- Can be configured with/without the Always on Top feature.
- Displays mouse cursor position in case the mouse cursor is over it.
- Runs in tray area of Windows XP/Windows 7/Windows 8/Windows 10.
- Can be launched as a standalone application.

## What's New in the?

With the Mouse Locator application, you can view the X and Y coordinates of your mouse cursor in real-time from any Windows system. Compatible with Windows 7, Vista, XP, 2000, and NT 4.5. The application does not change the mouse cursor's behavior or trigger any immediate action, but it will display the correct mouse pointer location to you. If you want, you can copy the coordinates to your clipboard for safe-keeping.

Download Mouse Locator FREE from Softpedia! Download Now... 1.07MB Mouse Locator 63 Advanced Mouse Locator features

Advanced Mouse Locator aims to be the ultimate mouse locator, a tool that combines the most useful mouse locator functions in a single application. It combines the following mouse locator functions:

1. A utility that allows you to determine your mouse pointer's on-screen X and Y coordinates in real-time.
2. A utility that records the cursor's X and Y coordinates in the Windows registry at the time it's first determined. This allows you to easily track the movements of the mouse cursor over time.
3. An on-screen mouse pointer's utility that displays a text cursor with the mouse's X and Y coordinates permanently visible on-screen.
4. A mouse pointer's utility that allows you to record the X and Y coordinates of the mouse pointer and store this

---

information in the Windows registry, all while it is constantly visible on-screen. 5. An easy-to-use mouse pointer's utility that shows you the mouse pointer's X and Y coordinates on-screen in real-time, which is of course useful if you want to easily determine the mouse cursor's position and pasting the coordinates to your clipboard. Advanced Mouse Locator is a utility that is easy-to-use and a no-nonsense utility that does not require any additional configuration or advanced knowledge to work properly. Features include: 1. A portable utility that can be used in the background. It does not require any installation, does not require any additional registry entries or modify any of your applications or operating system files. 2. A mouse pointer's utility that allows you to record the X and Y coordinates of your mouse pointer in the Windows registry, all while it is continuously visible on-screen. 3. A mouse cursor's utility that displays a text cursor with the mouse's X and Y coordinates permanently visible on-screen. 4. A mouse
